Subject: Microsoft Settlement

To whom it may concern,

I am a concerned citizen asking that a reasonable judgment be found against Microsoft. I think a reasonable settlement of this affair should include the open sourcing of Windows code.

It's too late for the competition to take hold now. Everyone is used to used Windows as an operating system. Every new system out there ships with it, and Microsoft is reported to even track companies who DON'T ship with it.

To put an end to their predatory practices and for security reasons, it is clear that Windows needs to be opened up so others may design competing operating systems.

After years of delay and legal maneuverings, this is your chance to finally do something to punish Microsoft and throw open the doors to true operating system competition.

Sincerely,

Charles T. Hunnefield
